Cable Puck & Cable Puck 4

The Cable Puck is a (two-piece) cable mounted accessory for tripod (3-Cable) and 4 cable mounting cylinders and other items. The three & four cable mount gives more stability in balancing the fixture without effort. The three & four legs are fixed in length and available in five sizes 8 inches, 12 inches, 16 inches, 24 inches and 36 inches.

- The half ball ends drops into the Cable Puck for simple assembly.
- The insertion of the fixture end of the cable is by use of our paddle system which only requires a 1/4" hole in the fixture in the three or four cable mount locations.
- Height adjustments are made with one center mounted 1/4"-20 male gripper that also completes the assembly of both halves of the Cable Puck. A *side or bottom exit gripper can be utilized as there is a cable exit hole on the bottom of the Cable Puck.*
- The Cable Puck has an integrated cord hole for cord management.
- This accessory is available as an option on our Cable Matrix for a Cable Canopy Set. (Suffix CP)

Component Parts

CC-PUCK Cable Puck two piece assembly Nickel Plated Zinc Casting

CC-PUCK 4 Cable Puck two piece assembly Nickel Plated Zinc Casting

Cables available in five lengths
