New Catalog and Product Information

Dear Valued Customer:

It is with great pleasure that we present to you the 2023 Pendant Systems catalog.

Here at Pendant Systems we are constantly redefining and refining suspension. I am proud to introduce many different items across the spectrum

- *Micro Series 3.5" Canopies and Crossbars. Round and Square. We can make any of the 5" Standard Flat Canopy Kits into a 3.5" Kit for Stem, Cable and Cord Mountings. These fit nicely on the 3" Mud rings used quite extensively in the commercial applications. Magnet Mounting continues to be a trend.*
- *Fixed Field Adjustable stem mounting canopy kits using the Micro ADJ Adapters. 1/8"IP, 1/4"IP & 3/8"IP*
- *New Micro Series Grippers for 1/32" & 3/64" Styles: Panel, Ball, Swivel Eye Crosscable Key Snaps, PD, HB*
- *1/32" Half Ball Stainless Cables*
- *3/64" Loop End Cables for Flat Panel Suspension Series*
- *T-Bar Twist Clip for Signage and Display*
- *Acoustical Suspension Spring for attachment point on Acoustical Baffles*
- *Flat Panel Suspension Systems with 24" Crosscable with Swivel Keysnap Ends*
- *High Bay Crosscable Paddle Systems Added 24.5" Crosscable Length to the 8", 12" & 36"*
- *Universal Mounting Kits for Flat Panel & High Bay Cross Systems*
- *Aluminum Shot Blast Looping grippers AL-LG 1/16, AL-LG 3/32 and AL-LG 1/8*
- *GR 1/4IP ALL & GR 3/8IP ALL Thread Grippers*
- *Swiveling Eye End Cables in 1/16" & 3/32" that pivot surface mounting hole to 90 Degrees or less.*
- *CC-Swivel Eyelet that marries to our Cable Couplers to be used with our stop end cables.*
- *Fixed Friction Swivel Assemblies for locking angle applications 1/4"IP & 3/8"IP Sizes*
- *Micro CG CAP Strain Relief for .125" to .180" Diameter Cords*
- *CG CAP SJT Strain Relief for 18/3 to 18/5 SJT Cords (Coming 3rd Quarter 2023)*
- *Over the past several years we have added new machinery and numerous different power cords as part of our product offerings. We stock an assortment of cord from 12-14-18-22 Gage Combinations. Cord is available per foot in bulk spool lengths or cut to specific lengths with jacket strips and wrapped with a wire tie. Special sizes can be accommodated by request along with conductor strips and #10 ground ring terminals. We can also do 5-Port End Molex Plugs on cord ends.*

We encourage you to visit our website for most up to date info: www.PendantSystems.com

Here at Pendant Systems we have worked very hard over the past 43 years to uphold our reputation of excellent service while offering the best quality product. We pride ourselves on our excellent, friendly customer service along with technical support that cannot be beat!

Thank you for your continued patronage and we look forward to serving all of your lighting suspension needs.

Sincerely,

Release Date: 5/19/2023

Michael C. Lenherr
President

Cable Kit ABC'S

This section is dedicated to understanding cable systems and components.

Kits can be divided into two type categories:

Feed Kits

Generally, a feed kit is mounted on a junction box using a crossbar.

A feed kit has a SJT cord coming through the canopy with a strain relief and a two piece cable coupler that allows access to the junction box without dropping the fixture.

Non-Feed Kits

A non-feed kit does not have power, nor does it necessarily have to be fastened to a junction box. A non-feed kit can utilize a one piece or the two piece cable coupler for a more universal look.

A canopy only has to have a center hole for mounting hardware and can be as small as 2 inches in diameter to cover a mounting clip on a T-Bar or fastener on the ceiling.

The top side of the assembly (*ceiling side*) has a cable with a molded stop on one end. The stop will fit into a **cable coupler** which has a hollow area and a female threaded 1/4"-20 thread on the top. The cable coupler acts as a fastener after the cable is pulled through the stop in front of the cable coupler.

A C-Slot Cable Coupler will allow the cable to adjust for a vaulted ceiling and allow the cable to hang perpendicular to the floor.

Cable Kit ABC'S

**CC1/4-20 One Piece
Cable Coupler**

#89 2" Canopy

**#94 5" Canopy
W/#102 Strain Relief**

**CC1/4-202P Two Piece
Cable Coupler**

The mounting hardware that attaches to the back of the cable coupler on the ceiling side will vary depending upon the kit type and the building structure. Below are various techniques for handling different mounting situations.

**Two piece cable coupler
assembly for fastening to
junction box. The coupler
will hold the canopy up in
a feed or non-feed kit**

**Use a #112 or 112-1/16 to make
loop with the stop end of cable
for looping around building
structure in a non-feed kit**

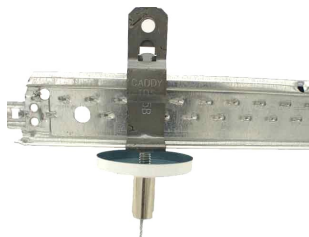

**Lag screw w/one piece cable
coupler for wood mounting
in a non-feed kit**

**Butterfly Toggle w/one piece
cable coupler for drywall
applications in a non-feed kit**

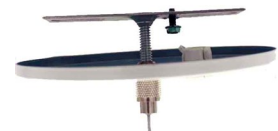

**Bolt in application for
mounting to unistrut in a
non-feed kit**

**IDS clip for drop ceiling
T-bar mounting in a non-feed
kit**

**Drop ceiling J-Box for feed
locations makes for a easy code
compliant installation.**

**Typical junction box mounting with
our custom crossbar w/strain relief
for feed or non-feed kit**

The fixture end has an adjustable Gripper . The top of the gripper has a plunger to allow movement of the gripper anywhere along the cable length. There are a multitude of grippers available for any size knock out on a fixture. Pendant Systems also has grippers that will capture a crosscable that will run from one side to the other of the fixture.

GR1/4IP

**Bottom exiting gripper made
for different size IP locknuts
and fixture knock out.**

MGR-SE-1/4-20

**Side exiting gripper bottom of
gripper tapped for screw**

MGR-SE-1/4-20-BS

**Made for capturing cross
cables**

MGR-SE-TH

**Captive gripper on 8" crosscable
with half balls ends . Key hole
slots are typically used w/ half
ball end cables (crosscable can
also be made w/ paddles)**

Pendant Systems

The Lighting Suspension Specialists www.PendantSystems.com P-215-638-8552 F-215-638-8554

Cable Kit ABC'S

Power feed tubes allow the passing of a cord through the same hole as the gripper.

A Power feed tube can be used between a gripper and the fixture.

This application is useful for a single cable fixture that only has one mounting point and balance is important.

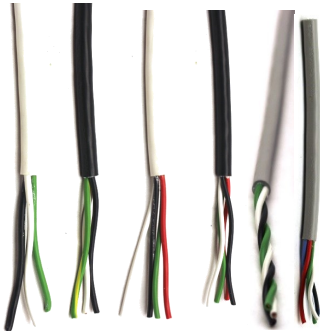

PF 1/8 PF 1/4 PF 3/8 PF 1/2 PF 3/4

PF-3/8 with a GR1/4IP gripper
shown with power cord usage

Power Cord

The following cords are often utilized in cable canopy sets:

18/3, 18/4 & 18/5 white,
black, & gray SJTOW

18/2 & 22/2 White,
Black, Gray, & Clear
AWM 2661

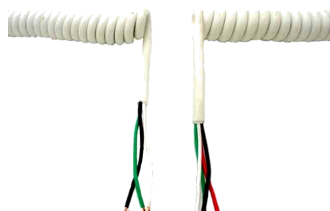

12/3 SJTOW and 12/4 SJTOW
(available in white and black) is
used on track lightings kits or
large continuous row applications

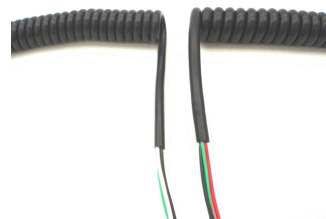

18/3, 18/4, 18/5 metal braid w/
clear jacket looks very similar to
aircraft cable

14/3 white & black
14/4 & 14/5 white
14/3 600V white SJTOW

18/3 & 18/4 White Coil Cord
Available in standard length
for 1'-4'
applications and extra long for
4'-12'
applications

18/3 & 18/4 Black Coil Cord
Available in standard length
for 1'-4'
applications and extra long for
4'-12'
applications

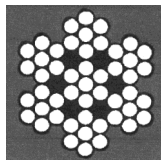

18/3 Clear SVT
18/4 Clear AWM 2661
18/5 Clear AWM 2661

Cable Gripper & Cable Strength Information

Cable Strength Relationships between Gripper & Cable Diameter for Loading Requirements

7 X 7 Cable

Information

Cable (also known as wire rope) is available in many different types of construction. Wire rope consists of strands laid helically around a supporting core. Individual strands are composed of a number of wires laid helically around a center (core) of wire. The lay of a cable is defined by the direction in which the strands are laid into the rope, and by the direction the wire is laid into strands.

Cable that is 7 X 7 refers to the number of strands (7) which has (7) wires each. The center strand (core), with 6 strands laid around the core. See illustration on the left.

Grippers can be used to suspend objects safely at angles of up to 60° from the vertical. However, suspension at angles does reduce the safe working load per the table to the right.

	Vertical	15°	30°	45°	60°
Load	100%	96%	86%	70%	50%
De-rating of Load	0%	4%	14%	30%	50%

Safety Recommendations

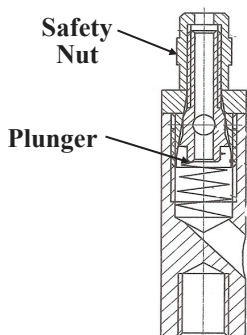

- Do not use for loads outside the stated range of the product
- Do not exceed the safe working load

- Do not apply paint or other coatings to cable
- Do not use in Chlorinated atmospheres
- To facilitate height adjustments, install the object below and adjust upwards to the desired level
- Inspect periodically and replace if worn, distorted, or damaged

Cable Gripper Designs

Within each cable gripper is a plunger that a cable slides through. There are three balls that surround the outside diameter of the cable as it passes through the gripper. When weight is applied to the gripper when mounted, the tension forces the balls to grab the cable in a pinching movement.

In normal operation the more the tension, the more the gripping. Some grippers come with a safety nut that locks the movement in both directions eliminating the potential for a release if the plunger is accidentally depressed by an end user.

Diameter ¹	Description ²	Break Strength ³	Gripper Slippage ⁴	Maximum Safe Load ⁵
1/32"	Micro Series	132	85	12
3/64"	Micro / MGR Series	270	227	30
1/16"	MGR-SE Side Exit Series	480	318	50
1/16"	MGR / GR Series	480	328	50
3/32"	GR Series	920	532	100

Notes:

1. Cable diameter is expressed in fractions of an inch and relates to the US standard of referring to cable diameters.
2. Describes series of Gripper Part#. The cable used in all tests conducted by Pendant Systems was 7 x 7 Galvanized steel cable.
3. The break strength is the minimum breaking force in pounds for that particular diameter of cable.
4. Gripper Slippage is the average force in pounds when the testing equipment sensed slippage within the gripper. Normally the cable slips, and the gripper holds again within a very small distance of cable.
5. Maximum safe load is based on 20% (percent) of the lowest observed force for that diameter cable. For multiple cables, add the weights together. Example for a linear fixture using 2 each 1/16" cables, 2 X 40 = 80 pounds of fixture with a 80% (percent) safety factor. Pendant Systems is conservative with loads but keep in mind that most junction boxes only support 50lbs & fan rated boxes support up to 75lbs.
6. Pendant Systems Grippers are not recommended for outdoor use or exposure to water, wind, chemical environments (such as swimming pools) or continuous movement (such as in front of a HVAC vent).
7. Use only uncoated 7 x 7 or 7 x 19 uncoated stainless or galvanized steel aircraft cable.
8. Weight guidelines are for static loads at 5% or less of an angle. For angled suspension, use our CC-Slot cable coupler or ADJ foot adjustable grippers.
9. Always allow at least 1" of cable to pass beyond the body of the gripper.

Disclaimer:

The information shown on the chart above is based on independent tests conducted for Pendant Systems. The information shown may vary with gripper model and cable diameter. Pendant Systems recommends each customer determine their individual specific requirements. Please contact Pendant Systems for additional information if required.

Pendant Systems

The Lighting Suspension Specialists www.PendantSystems.com P-215-638-8552 F-215-638-8554

Introducing our New “Lighting Suspension Cord”!

Redefining and Refining Suspension

1/16 Aircraft cable is now incorporated with the Power Cord

No need for cable ties, and offers a sleek ,minimalistic appearance

Standard Feed Kit using Lighting Suspension Cord and 2 Piece Gripper-Coupler

Newly developed MGR CC1/4-202 P NK is a gripper coupler that accepts the half ball end of an aircraft cable.

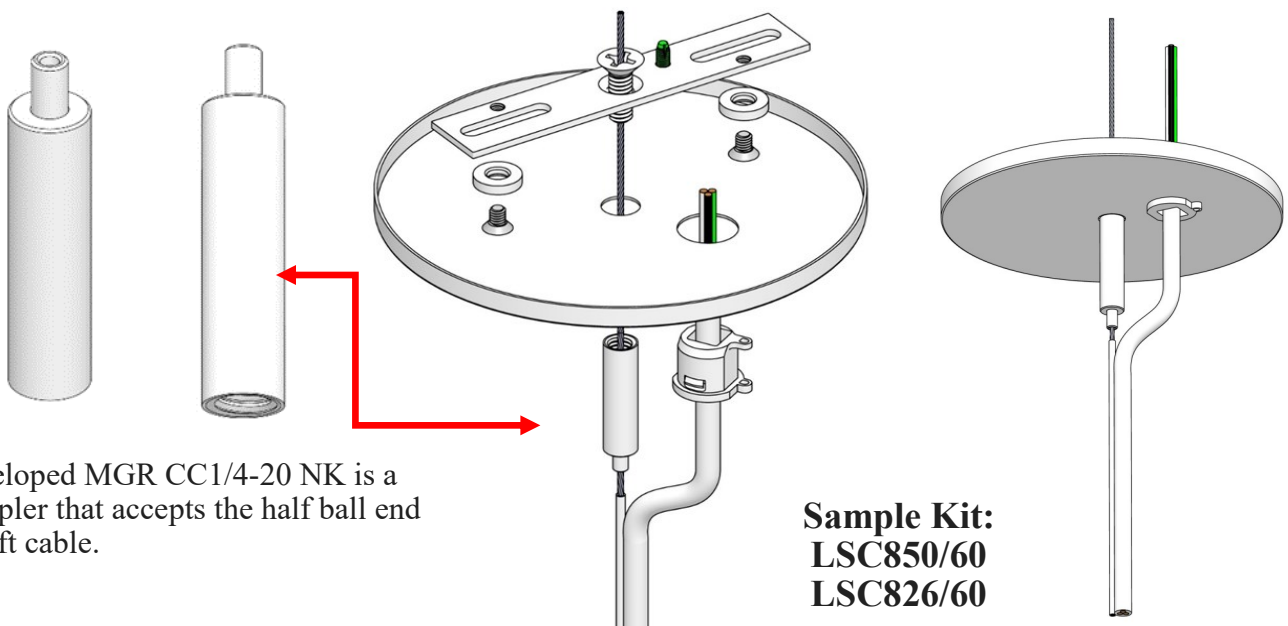

Aircraft cable is insulated and will breakaway from power cord.

Installation Tip: Leave insulation on cable and cut to length before stripping insulation to avoid fraying of the 7x7 steel cable

Another gripper suited to the fixture will be on the other end as well

Magnet Mounted Feed Kit using Lighting Suspension Cord and 1 Piece Gripper-Coupler

Newly developed MGR CC1/4-20 NK is a gripper coupler that accepts the half ball end of an aircraft cable.

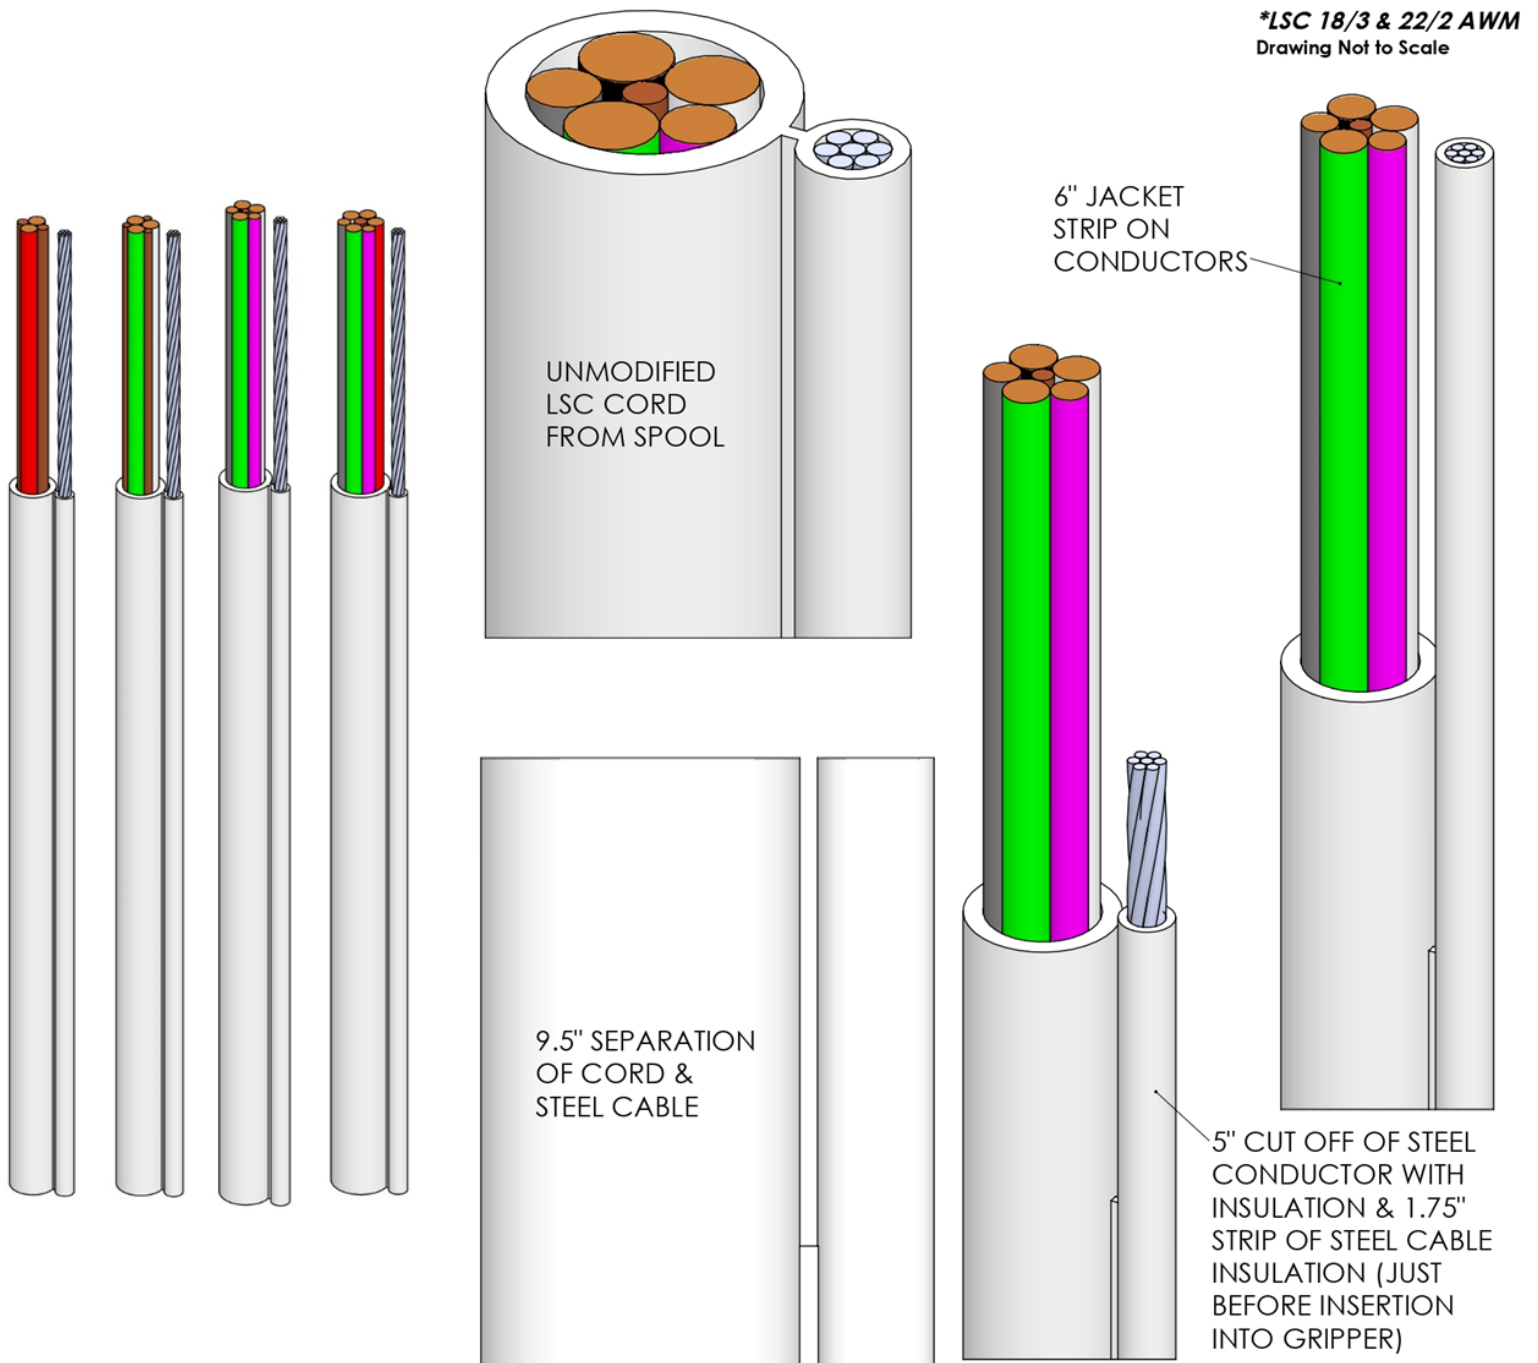

Sample Kit:
LSC850/60
LSC826/60

HB Plate & Swivel Clip

Ceiling Canopy Mounting

Mono Point Product Features

- Single Point Mounting System for Feed and Fixture Support from a center location
- Uses Magnets to hold up canopy
- Available with Square or Round Canopies
- Retrofitting existing High Bay HID Systems is easier
- Mounts to 4" square and 4" octagonal boxes easily with universal mounting pattern screw hole slots
- Custom extruded cable slot holders to allow cable to swivel outward to ends of fixture
- Low profile
- Interchangeable center mounting plate with 1/8" IP, 1/4" IP, 3/8" IP, 1/2" IP & Half Ball Swivel Plate
- Cord or Stem Power Feed to fixture
- Stem fixed or swivel mounted to give more stability in air movement situations
- Can be used with side support cables or stand alone stem mounting for use as a normal stem configuration

Applications

- High Bay Cord or Stem Feed (Fixed or Swivel)
- Direct / Indirect Cord or Stem Feed
- Exit Cable or Stem Mount
- LED or Cylinder 2-point Mount
- Parking Garage Retrofit with Center Fixed or Swivel Stem Feed & Stainless Cables to minimize movement

Finishes

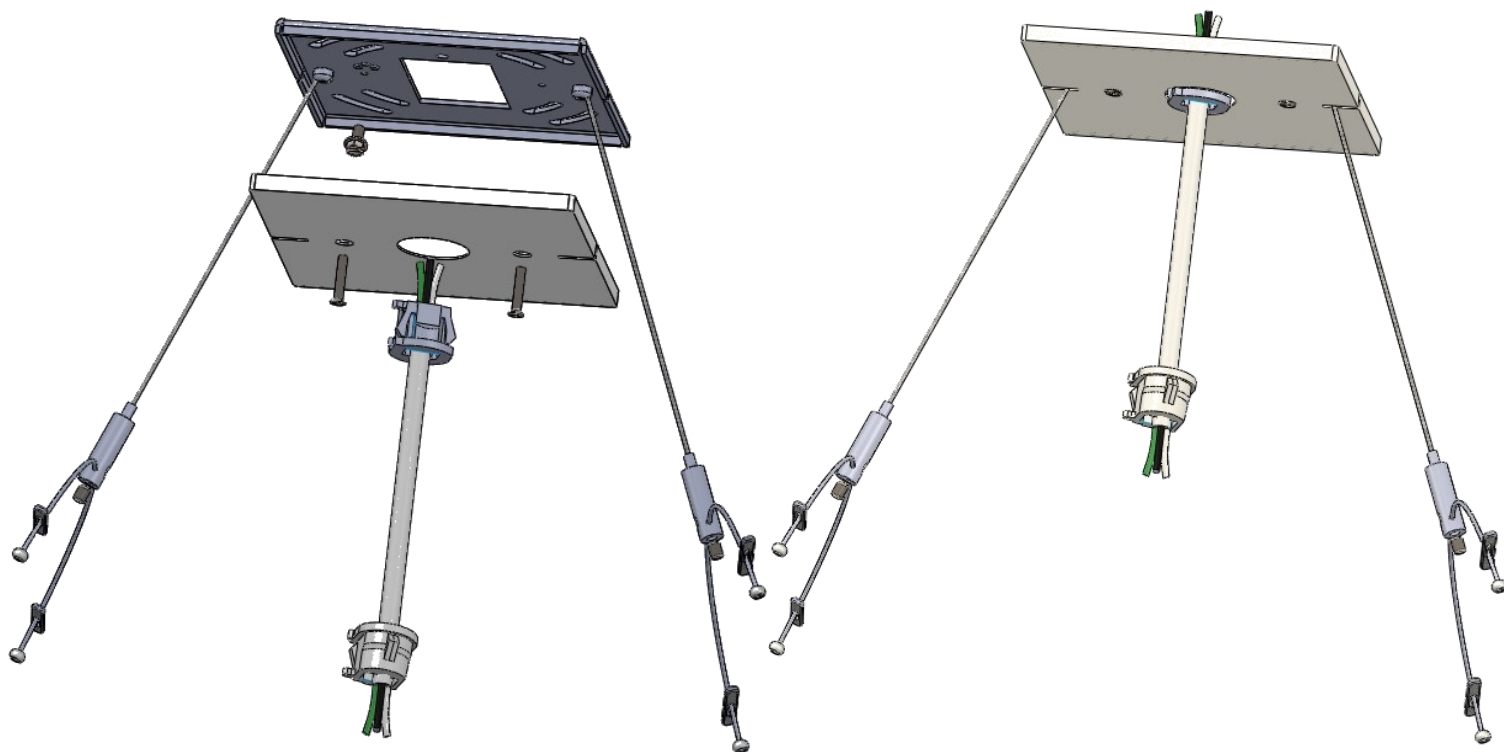

White, Black, Nickel, Brushed Nickel

Mono Point High Bay Cord Feed System

Mono Point High Bay Cord Feed Product Features

- Single Point Mounting System for feed and fixture support from a center location
- Retrofitting existing High Bay HID Systems is easier
- Mounts to 4" square and 4" octagonal boxes easily with universal mounting pattern screw hole slots to vary the positioning of the fixture (50 lb. maximum weight load per NEC 314.27)
- Custom extruded cable slot holders allow cable to swivel outward toward ends of fixture for support
- Adjustable height and low profile for a clean look
- Various type cord can be included in kit
- A strain relief is provided for .290"-.385" diameter cables for fixture & canopy with .875" knock out openings
- Various grippers for fixture attachment are available. See Mono Point Ordering Matrix for Part #'s
- 1/16" HB End Cable Lengths of 24" & 36" Stainless and 50", 60", 120", 180", 240" Galvanized Available

Applications

- High Bay Lighting , Direct / Indirect Lighting, LED or Cylinder 2-point Mount
- Static (stationary loads only), Not Dynamic (swaying or wind conditions not recommended)

Finishes

White Canopy, Galvanized MP-Crossbar

MONO POINT STEM SERIES: MAGNET SWIVEL STEM FEED SYSTEM

- Sleek Design
 - Available in Round or Square Canopies
 - Single Point Mounting System for feed and fixture support from a center location
 - Minimizes fixture movement
 - Stem lengths are fixed and available in 1/8"IPS, 1/4"IPS, 3/8"IPS & 1/2"IPS diameters. Patent# US 9133981B2
- (Stems must be ordered separately).
- Swivel Rotation depends on the size of stem. 1/8"IPS (45°), 1/4"IPS (45°), 3/8"IPS (42°) & 1/2"IPS (38°)
 - Available in Field Cut Adjustable System to cut and pin stem to desired height without threading stem for 3/8"IPS, 1/4"IPS & 1/8"IPS sizes (Add Suffix ADJ) ; Drill Bit & Allen wrench are included (Tool Kit)

Cord Kit Mini

*The Cord Kit Mini is low profile with a simple design.
Light weight suspension with 5-lb capacity.*

Cord Kit Mini Brushed Nickel

Parts included:

- 1- Cord Grip BN -Brushed Nickel Plated Metallic Mini Cord Grip 1/8 IP Male
- 1- 6" Green Ground Lead
- 1- #58 Crossbar Zinc W/GS 1/8 IP
- 1- #93B BN- Brushed Nickel Plated Canopy 5"W x 0.25" Deep

Cord Kit Mini Nickel

Parts included:

- 1- Cord Grip NK- Metallic Nickel Plated Mini Cord Grip 1/8 IP Male
- 1- 6" Green Ground Lead
- 1- #58 Crossbar Zinc W/GS 1/8 IP
- 1- #93B NK Nickel Plated Canopy 5.0" W x 0.25" Deep

***Ground
Screw Stud
(GS) Available
on canopy**

Cord Kit Mini Assembled

Cord Kit Mini White

Parts included:

- 1- CG WHT Metallic White Powder Coated Mini Cord Grip 1/8 IP Male
- 1- 6" Green Ground Lead
- 1- #58 Crossbar Zinc W/GS 1/8 IP
- 1- #93B White Powder Coated Canopy 5" W x .25" Deep

Cord Kit Mini Black

Parts included:

- 1- Cord Grip Bk-BK Metallic Black Powder Coated Mini Cord Grip 1/8 IP Male
- 1- 6" Green Ground Lead
- 1- #58 Crossbar Zinc W/GS 1/8 IP
- 1- #93B Black Powder Coated Canopy 5" W x .25" Deep

Notes:

1. Kit will only work with SVT or round cord with diameters of .190"-.260"
2. Mount Crossbar with extruded thread hole towards canopy
3. Use compression fitting cap to retain canopy against canopy and ceiling while compressing cord.

[X]/[X] refers to the I.D. Where the stem will sit

[X]/[X] refers to the thread (IPS)

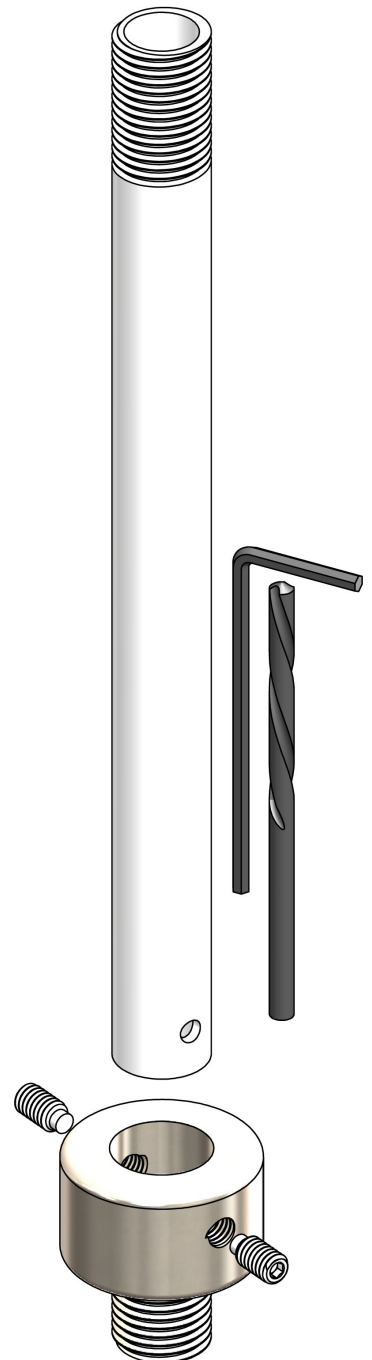

273

1. Cut stem to desired length and deburr inside edge. Insert SA (Stem Adapter) casting onto the stem with the edge of the cut even with the back of the casting and insert one of the #273 screws and tighten the set screw in the casting so the screw "bites" onto the stem.
2. Drill a 1/8" hole through the tapped hole, opposite the set screw on the casting through the stem. *Always use eye protection*
3. Loosen the set screw in the casting and rotate 180 degrees placing the set screw centered on the drilled 1/8" hole. Tighten screw allowing the stem to be fastened in place. *You should see one pin on the inside of the stem when set correctly.*
4. Drill a second 1/8" hole through the other tapped hole on the casting and through the stem. *Deburr any sharp edges on the I.D. of the stem from drilling holes.*
5. Insert and tighten the second #273 screw into the tapped hole and through the drilled hole in the stem using the Allen Wrench so the pin engages through the inside of the stem.

All electrical connections should be done by qualified electrician with power off

SSS

ADJ-SS

1- Cut stem to desired length and deburr inside edge. Insert ADJ casting onto the stem with the edge of the cut even with the back of the casting and insert ADJ-SS screw (*short one*) and tighten the set screw in the casting to the stem.

2- Drill a 1/8" Hole through the hole on the casting opposite the set screw. *Always use eye protection.*

34 TK

3/8" IP Slip Ball W/Set Screws & Drill Bit & Allen Wrench

3- Loosen set screw in casting and rotate 180 degrees placing set screw centered on drilled 1/8" hole. Tighten screw allowing screw to be centered on hole. *You should see pin on inside of tube when set correctly.*

4- Drill a 2nd 1/8" hole through the hole on the casting opposite the set screw. *Deburr any sharp edges on ID of stem from drilling holes.*

35 TK

1/4" IP Slip Ball W/Set Screws & Drill Bit & Allen Wrench

5- Remove short set screw on casting and insert SSS (*socket set screw-long one*) into tapped hole through the drilled hole in stem and through to other side of stem. Tighten set screw using Allen wrench so pin engages through opposite 1/8" drilled hole on opposite side of stem and into casting.

All-in-One Stem Kits

- All stems come in 36" increments; going up to 108". Each stem is 36" long
- Stems are mated together with 1 1/2" Nipples
- 3 and 5 single conductor wires are available with wire nuts
- Kits are available in Matte White and Matte Black
- Kits Come in Round and Square versions

SK3/8-ID RDFL[XX]5W

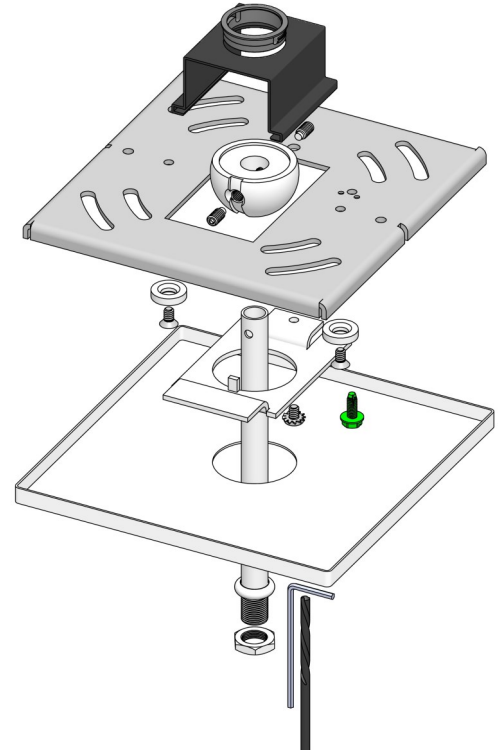

***ONLY I.D. Stem can be mated together to create longer stems.**

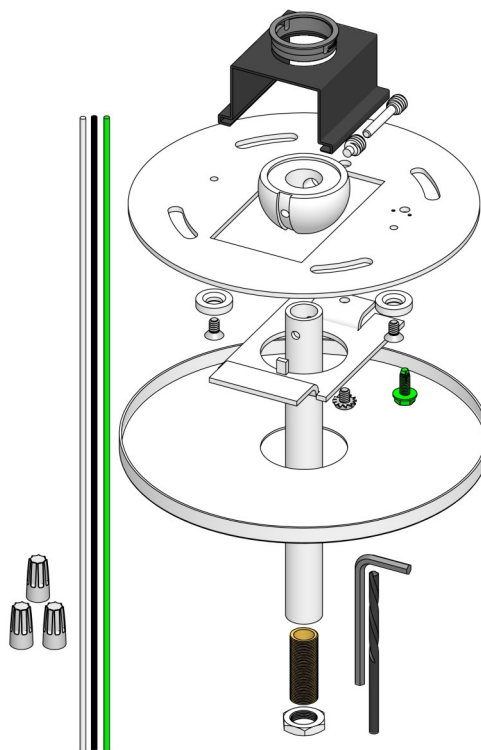

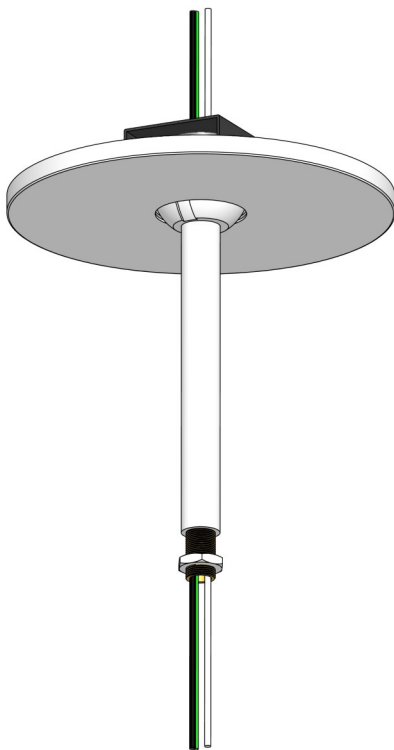

Example Part #'S

- SK3/8-ID RDFL365W
- SK3/8-ID RDFL725W
- SK3/8-ID RDFL1085W
- SK1/4-ID RDFL363W
- SK1/4-ID RDFL723W
- SK1/4-ID RDFL1083W

SK1/8-OD SQFL36

SK1/4-ID RDFL[XX]3W

***Deep Canopy Versions of All-In-One Kits are also available**

Power Feed Tubes

PF 1/8 PF 1/4 PF 3/8 PF 1/2 PF 3/4

PF-3/8 W/GR-3/8IP Gripper installed into top of Power Feed Tube

Power Feed Tube Series

Sizes available:

1/8"IP, 1/4"IP, 3/8"IP, 1/2"IP, 3/4"IP

Power Feed Tubes can be used to create a side cord hole when hanging from a single mounting point. The cord hole is cut on a diagonal for easy entry of cable. A reversed cut 3/8"IP Power Feed Tube is also available for use if exiting cord is from ceiling side. (See below and next page for assembly).

<u>Catalog#</u>	<u>Description</u>	<u>Bottom O.D. IPS Fixture Side</u>	<u>Top I.D. IPS Gripper Side</u>	<u>Overall Length</u>	<u>Cord Hole Diameter</u>

Cable Puck & Cable Puck 4

The Cable Puck is a (two-piece) cable mounted accessory for tripod (3-Cable) and 4 cable mounting cylinders and other items. The three & four cable mount gives more stability in balancing the fixture without effort. The three & four legs are fixed in length and available in five sizes 8 inches, 12 inches, 16 inches, 24 inches and 36 inches.

- The half ball ends drops into the Cable Puck for simple assembly.
- The insertion of the fixture end of the cable is by use of our paddle system which only requires a 1/4" hole in the fixture in the three or four cable mount locations.
- Height adjustments are made with one center mounted 1/4"-20 male gripper that also completes the assembly of both halves of the Cable Puck. A *side or bottom exit gripper can be utilized as there is a cable exit hole on the bottom of the Cable Puck.*
- The Cable Puck has an integrated cord hole for cord management.
- This accessory is available as an option on our Cable Matrix for a Cable Canopy Set. (Suffix CP)

High Bay / Cable Tray Loop and Y-Hook Suspension Kits

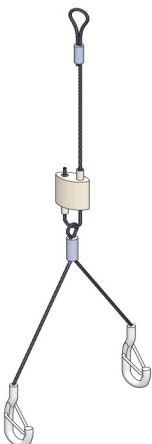

High Bay / Cable Tray Kit allows use of our standard galvanized steel 3/32" stock cable assemblies with 1" loop end over structure. Then the cut end of cable captures the loop in Y-Hook cable assembly using the KL-100 Kwik-Loc device. The height adjustability would be directly overtop the fixture / cable tray end for easy adjustability. 150 Lbs. Per Cable Max Weight

Junction Box for Drop Ceiling Installations

Pendant Systems Part# **J-Box**

- Intertek Listed 2 1/8" deep octagonal box to mount over T-Bar Pendant Systems File# 4001708
- Complies with Article 400.8 NEC with issues concerning cord through drop ceilings
- Support tab provided on back of box for independent support for both junction box and attached lighting fixture to structure above. Support is required in drop ceilings to comply with building and electrical codes.
- Ground screw hole location and knockouts located for easier access after mounting on T-Bar.
- 8/32" mounting screws included
- Knockouts provided for regular type ceiling tiles to keep junction box flush with ceiling tile edge

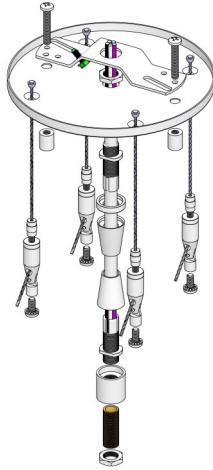

Pictures below show easy accessibility and assembly of the crossbar, two piece cable coupler and junction box (J-Box)

Glass Cap 1/8 IP BN

Glass Cap 1/8 IP NK

Glass Cap for the Top of Fixture or
Glassware 1.94"W x 1.2" H x .4"

Opening (1/8 IP Slip)

Available Nickel & Brushed
Nickel Finishes

#272 ADJ - 1/8" IP Tapped Half Ball (No 273 Screws)

#34ADJ -3/8" IP Slip Half Ball Bright Casting W/ADJ Screw

#35ADJ-1/4" IP Slip Half Ball Bright Casting W/ADJ Screw

Bright Zinc Casting for #33 Crossbar
Add Suffix WPB for Matte White and BPB for Matte Black

#ADJ-SS

1/4"-20 Short (.350" Long) Socket
Set Screw w/ .125" Diameter Point
& 1/8" Allen Hex Head Pin for ADJ
Series Half Balls

#SSS

1/4"-20 Socket Set Screw
w/ .125" Diameter &
1/8" Allen Hex Head Pin for
ADJ Series Half Balls

#147 Half Ball

1/2" IP Ball Assembly
Available in Matte White
(147Wht) & Matte Black (147BK)

Strain Relief Products

#213 & #252

Metal Strain Relief for Round

#213- 18/3 & 18/4 SJT
Cord .300"-.343" Diameter Cables

#252- Round SJT
Cord .375"-.420" Diameter

#131

1/2 " IP Threaded Female Bushing
with center .4" Cord Hole
.474"L x 1"W x .39"
1/2 IP Thread

#153- 1/4" Diameter Nylon Cable Strap
W/ .206" Screw Hole Natural Heyco #3324

#234- 1/8" Diameter Nylon Cable Strap
W/ .210" Screw Hole Natural Heyco #3302

#237

.875" Hole Bushing Black Heyco
Part# 2850N
.945"W x .750"ID x .250"H x .063"
Max Panel Thickness

#111 & 111BK

4" Cable Ties
For Securing Power Cord
to Aircraft Cable

#154

Black Split Snap Bushing for .500" Hole

#288

Plastic Black .625" Hole Split Insulated Hole
Bushings .450" ID Heyco # 2872

#247- White Snap Bushing for .375" Hole

#152- White Snap in Bushing for .500" Hole

#216- White Snap in Bushing for .625" Hole

#229- White Snap in Bushing for .875" Hole

#151

1/4"-Hole Plugs .315"H
Used to plug large side of
keyhole for Cross Cables
with Half Ball end fittings

#169

7/32"-Hole Plugs .25"H
Used to plug large side of
keyhole for Crosscables
with Half Ball end fittings

#299- White Snap Bushing for .875" Hole

#299 BK- Black Snap in Bushing for .875" Hole
.290"-.385" Cords

#288
Split Bushing for
.625" Hole

#290 & 290 BK
Universal Bushing for .875"
Hole
Heyco 2129 Plastic
White .875" Hole Universal
Insulated Hole Bushing .560"

#292
Blank Hole
Bushings for .875"
Hole

#300- White Snap Bushing for .625" Hole
#300 BK- Black Snap in Bushing for .625" Hole
.130"-.210" Cords

Strain Relief Products

CG Cap WHT-(Matte White Cap)
CG Cap BN- (Brushed Nickel Cap)
CG Cap BK- (Matte Black Cap)
CG Cap NK-(Nickel)

Cord Grip Cap 1/8"IP Female W/ CG Plastic Base for
 .190"-260" Diameter Round Cord
 Intertek certified to UL #635 standard

CG Check Ring WHT-(Matte White)
CG Check Ring BN- (Brushed Nickel)
CG Check Ring BK- (Matte Black)
CG Check Ring NK-(Nickel)

Check ring for CG Base part of CG CAP (Part shown on Left)
 when mounting CG Base on surface of fixture

CG Coupler WHT-(Matte White)
CG Coupler BN- (Brushed Nickel)
CG Coupler BK- (Matte Black)
CG Coupler NK-(Nickel)

Coupler for Cord Grip, 1/8"IP Female
 Dimensions are .7"W X .675"H

255 BK
 Lock-It Style Strain Relief for
 1.109" PF Hole
 Fits .600"-.700" Cord

171 WHT/BK
 7/8"(.875") KO Strain Relief for
 18/3, 18/4 & 18/5 SJT Cord
 Connector Snaps and Locks
 around Cord
 Fits .290"-.385" cord

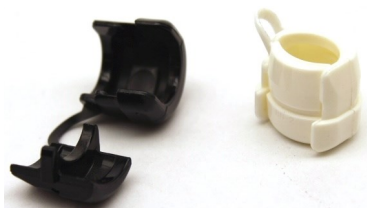

126 WHT/BK
 Lock-It Style Strain Relief for .875" PF Hole
 for 12/3, 14/3, 14/4 & 18/5
 .380"-.450" cord

102BK 102
 Lock-It Style Strain Relief for .625"
 PF Hole for 18/3 & 18/4
 Fits .300"-.330" Cord
 Locks around cord before insertion

248BK 248
 Lock-It Style Strain Relief for .625" PF
 Hole
 Fits .220"-.290" for SVT cord
 Locks around cord before insertion

260BK 260
 Compression Style Strain Relief
 for .875" PF Hole for 14/3,14/4,
 14/5, 12/3, & 12/4
 Fits .530" - .600" Cord

Cord Grip 1/2" IP Blk/Wht/GY
 Strain Relief for .170" - .450" DIA Cord
 (AMW, SJT, SVT) x 1/2" IP Male
 1.72" L x 1.050" Across Flats x 1.144"
 1/2" Thread

Cord Grip Blk/Wht/GY
 Strain Relief for .105"-.315" DIA
 Cord
 18/3 SJT Cord x 3/8"IP Male
 1.56"L x .746"Across Flats x .575"
 3/8" Thread
